PII: S0960-0760(01)00054-1

SUBJECT INDEX

Alzheimer's disease
  and estrogen, 227
Androgen(s)
  receptor(s)
    in syndromes of androgen insensitivity and in prostate cancer, 135
    selective DNA binding by the, as a mechanism for hormone-specific gene regulation, 23
Antiestrogen(s)
  control of the estrogen-like actions of the tamoxifen-estrogen receptor complex by the surface amino acid at position 351, 61
  molecular and pharmacological aspects of, resistance, 71
Antisulfatase agents
  in breast cancer, 95
Aromatase inhibitors
  intracellular aromatase and its relevance to the pharmacological efficacy of, 199
  recent advances in the clinical application of, 179
Assembly assay
  new insights into receptor ligand binding domains from a novel, 3

Breast cancer
  and enzyme activity, 95
  molecular and pharmacological aspects of antiestrogen resistance in, 71
  recent advances in the clinical application of aromatase inhibitors, 179
Breast cancer cells
  estrogen regulated proteases and antiproteases in ovarian and, 119
  hormonal regulation of tumor suppressor proteins in, 105
Breast tumors
  expression of the 11β-hydroxysteroid dehydrogenase type II enzyme in, and modulation of activity and cell growth in PMC42 cells, 153

Cell nucleus
  compartmentalization of regulatory proteins in the cell nucleus, 9

1,25-Dihydroxyvitamin D
  effects of, on skeletal and calcium homeostasis and on inhibition of tumor cell growth, 43
DNA binding
  selective, by the androgen receptor as a mechanism for hormone-specific gene regulation, 23

Endometrial cells
  MHC class II expression and antigen presentation by human, 203
Estrogen(s)
  Alzheimer's disease and, 227
  receptor(s)
    paradoxical interactions among, estrogens and SERMS: mutual annihilation and synergy, 85
    regulation of proteases and antiproteases by, in ovarian and breast cancer cells, 119

Gonadotropin
  regulation by, of steroidogenic enzymes and novel gonadal genes, 187

Hormone-specific gene regulation
  selective DNA binding by the androgen receptor as a mechanism for, 23
3β-Hydroxysteroid dehydrogenase1/Δ^5–Δ^4 isomerase
  multiple signal transduction pathways mediate interleukin-4-induced, in normal and tumoral target tissues, 213
11β-Hydroxysteroid dehydrogenase type II
  expression of the, enzyme in breast tumors and modulation of activity and cell growth in PMC42 cells, 153
17β-Hydroxysteroid dehydrogenase
  analysis and characteristics of multiple types of human, 143
  types in human breast cancer, 95

Interleukin-4
  multiple signal transduction pathways mediate, -induced 3β-hydroxysteroid dehydrogenase1/Δ^5–Δ^4 isomerase in normal and tumoral target tissues, 213

Leydig cell
interaction of thyroid hormone and steroidogenic acute regulatory (StAR) protein in the regulation of murine, steroidogenesis, 167

MHC class II expression
and antigen presentation by human endometrial cells, 203
mRNA
of sulfatase and sulfotransferase in human breast cancer, 95

Ovarian cancer cells
estrogen regulated proteases and antiproteases in, 119

Prostate cancer
androgen receptor in, 135
vitamin D and, 125
Pseudohermaphroditism
and human 17β-hydroxysteroid dehydrogenase type 3, 143

Receptor(s)
androgen(s)
in syndromes of androgen insensitivity and in prostate cancer, 135
selective DNA binding by the, as a mechanism for hormone-specific gene regulation, 23
estrogen(s)
paradoxical interactions among, estrogens and SERMS: mutual annihilation and synergy, 85
ligand binding domains
new insights into, from a novel assembly assay, 3
vitamin D
ligands for the, endocrine system, 49
Regulatory proteins
compartmentalization of, in the cell nucleus, 9

SEEM: selective estrogen enzyme modulator
in breast cancer, 95
SERM(s)
paradoxical interactions among estrogen receptors, estrogens and, mutual annihilation and synergy, 85
Steroid(s)
resistance to multiple, in two sisters, 161
Steroidogenic acute regulatory (StAR) protein
interaction of thyroid hormone and, in the regulation of murine Leydig cell steroidogenesis, 167
Steroidogenic enzymes
gonadotropin regulation of, 187
Sulfatase
action in breast cancer, 95
Sulfotransferase
action in breast cancer, 95
Syndromes of androgen insensitivity
the androgen receptor in, and in prostate cancer, 135

Tamoxifen
control of the estrogen-like actions of the, -estrogen receptor complex by the surface amino acid at position 351, 61
Thyroid hormone
interaction of, and steroidogenic acute regulatory (StAR) protein in the regulation of murine Leydig cell steroidogenesis, 167
receptor(s)
selective modulation of, function by hormone analogs and protein-protein interactions, 31
Tibolone
a steroid with a tissue specific mode of action, 231
effect of, on sulfatase activity in breast cancer, 95
Tumor cell growth
effects of 1,25-dihydroxyvitamin D on skeletal and calcium homeostasis and on inhibition of, 43
Tumor suppressor protein(s)
hormonal regulation of, in breast cancer cells, 105

Vitamin D
and prostate cancer, 125
ligands for the, endocrine system, 49
